Objective

Highly motivated and results-oriented UX/UI Designer and Full Stack Web Developer with a passion for creating user-centric and visually appealing web experiences. Proven ability to design, develop, and implement responsive e-commerce websites and task management applications using technologies like React, Node.js, Angular, MySQL, MongoDB, and Adobe XD. Seeking a challenging position to leverage my design and development skills to contribute to the success of a growing tech company.

Projects

E-commerce Website - *Dec 2023 – Feb 2024*

UX/UI Design & Front-End Development

- Led the design and development of a responsive e-commerce platform.
- Crafted intuitive user interfaces and engaging user experiences.
- Implemented robust front-end architecture using React and Query.
- Developed reusable UI components and optimized performance.

Back-End Development

- Built a scalable back-end using Node.js, Express, and Mongoose.
- Developed RESTful APIs for product management, user authentication, and order processing.
- Implemented database schemas and optimized data retrieval.

Key Achievements

- Successfully launched a fully functional e-commerce platform.
- Improved user engagement through data-driven design decisions.
- Optimized website performance for fast loading times.
